

Sports Venues

Sports venues provide one of the most visible environments for drainage systems, electrical pits and manhole covers. World class running tracks require the highest accuracy of construction and the inclusion of precision manufactured products.

As an ISO 9001 registered company, ACO has supplied a variety of products including drainage systems, electrical pits and access covers to a variety of sports precincts, and recreational facilities, ranging from those owned by private schools and councils to those used as world class venues. ACO is the acknowledged market leader in sports drainage systems and since 1972 has supplied drainage and ancillary products to every Olympic Games, including the track drainage for each of the main stadiums.

ACO offers a full product line of running track drainage and other related track and field accessories designed to IAAF standards, complemented by a broad range of access covers, electrical pits and high performance stainless steel building drainage systems, ideal for the adjoining sports bars, restaurants and public amenities.
