

GET MORE OUT OF YOUR FUEL™

FUEL DISPENSER FILTER SELECTION...EASY!

C US

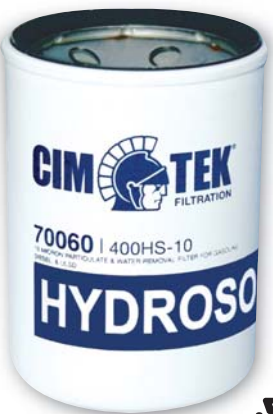

PARTICULATE FILTER

Resin-impregnated cellulose media

- Used to remove dirt, rust, etc.
- Recommended for gasoline, diesel, & ULSD
- Easy to install with *Pre-lubed Gaskets

CIM-TEK PART #	MODEL	MEDIA
70010	300-10	Cellulose
70015	400-10	Cellulose
70058	300BMG-10	Microglass
70104	400BMG-10	Microglass

*Pre-Lubed gaskets standard for all Particulate, Hydrosorb, & Ethanol-Blend Filters

C US

HYDROSORB FILTER

Water absorbent microglass media

- Used to detect water & remove dirt, rust, etc. in gasoline, diesel & ULSD
- When water is present, the filter will slow down flow dramatically...this means too much water in the fuel
- 3X the dirt-holding capacity over cellulose filters

CIM-TEK PART #	MODEL	MEDIA
70059	300HS-10	Microglass
70060	400HS-10	Microglass

C US

ETHANOL-BLEND FILTER

Phase-separation detecting media

- Used to detect "phase separation" in ethanol blends up to E15
- When phase separation is present, the filter will slow down flow dramatically...this means too much water in the fuel
- Call Cim-Tek about **Reversing Phase-Separated Fuel!** (Hydroburn PSR™)

CIM-TEK PART #	MODEL	MEDIA
70122	300MB-10	Microglass
70120	400MB-10	Microglass
70705	300MC-10	Cellulose
70707	400MC-10	Cellulose
