

Spill Response For Outdoor Oil Spills

Booms

Take Control of Outdoor Spills with Booms, Sweeps and Special Sorbents

Use SockNet Booms to Absorb and Contain Oil

Strong mesh outer skin encases a poly sock sleeve filled with highly-sorbent polypropylene. Filler won't shed and Booms won't sink, even when saturated with oil. A nylon rope and sturdy hardware ensure long-lasting durability and easy retrieval.

Stainless-Steel Hardware

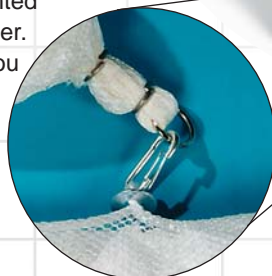

SockNet Booms can be linked together to contain any size spill on water. Clip together with long-lasting stainless steel connector hardware.

Special-Use Sorbents

Once a spill is contained, it's time for sorbents such as PomPoms, Net Bags, Sweeps and Particulates. These products are tossed on the surface to absorb spills and surface sheen. Because they're for oil only, they'll absorb the oil but not become weighted down with water. This means you can leave them in place longer for maximum absorption.

WB820SN

Durable, easy-to-use boom connectors provide a simple and efficient way to create a containment system big enough to handle almost any spill.
