

## Spill Response Products

**PomPoms**  
APMPM and APMPM-R

Thousands of thin strands of polypropylene are joined together to create this high-surface-area sorbent. Heavy oils adhere, water is repelled. Sold bulk, or on a 50' rope.

**Containment Boom**  
C-BOOM\*

Non-absorbent Boom contains spills on water—doesn't absorb them. Floats 6" above the water's surface—a 12" draft keeps oil and debris from slipping under the Boom.

\*Drop-shipped from vendor.

**Net Bag**  
WPIL10

Polypropylene strips encased in a nylon mesh bag—used to absorb larger spills on water. Just toss it on the spill. Floats for easy retrieval—even when saturated.

**Folded Sweep**  
WSWL100F

Used to catch oily sheens that linger behind sorbent booms. Sturdy construction offers nylon tension straps securely attached to durable MultiLaminate Mat.

**Loose Particulate**  
WPART

White particulate Oil-Only sorbent is made of loose polypropylene pulp. Use to absorb oil on the surface of water bodies or on land-based oil spills.

Booms

### Booms

(for oils, not water)
